(d) The provisions of this section shall also apply to national forest system roadless lands in the State of Arizona which are less than five thousand acres in size.

Sec. 104. Section 3(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1274) is amended by inserting the following after paragraph (50):

"(51) Verde, Arizona.—The segment from the boundary between national forest and private land in sections 26 and 27, township 13 north, range 5 east, Gila Salt River meridian, downstream to the confluence with Red Creek, as generally depicted on a map entitled ‘Verde River—Wild and Scenic River’, dated March 1984, which is on file and available for public inspection in the Office of the Chief, Forest Service, United States Department of Agriculture; to be administered by the Secretary of Agriculture. This designation shall not prevent water users receiving Central Arizona Project water allocations from diverting that water through an exchange agreement with downstream water users in accordance with Arizona water law. After consultation with State and local governments and the interested public and within two years after the date of enactment of this paragraph, the Secretary shall take such action as is required under subsection (b) of this section.".

Sec. 105. There are added to the Chiricahua National Monument, in the State of Arizona, established by Proclamation Numbered 1892 of April 18, 1924 (43 Stat. 1446) certain lands in the Coronado National Forest which comprise approximately eight hundred and fifty acres as generally depicted on the map entitled "Bonita Creek Watershed", dated May 1984, retained by the United States Park Service, Washington, D.C. The area added by this paragraph shall be administered by the National Park Service as wilderness.

TITLE II

Sec. 201. The Congress finds that—

(1) the Aravaipa Canyon, situated in the Galapago Mountains in the Sonoran desert region of southern Arizona, is a primitive place of great natural beauty that, due to the rare presence of a perennial stream, supports an extraordinary abundance and diversity of native plant, fish, and wildlife, making it a resource of national significance; and

(2) the Aravaipa Canyon should, together with certain adjoining public lands, be incorporated within the National Wilderness Preservation System in order to provide for the preservation and protection of this relatively undisturbed but fragile complex of desert, riparian and aquatic ecosystems, and the native plant, fish, and wildlife communities dependent on it, as well as to protect and preserve the area's great scenic, geologic, and historical values, to a greater degree than would be possible in the absence of wilderness designation.
